NOTICE FOR PROPERTY OWNERS AND OUR VACATIONING PUBLIC

One never knows when an emergency will happen. One can only hope nothing happens while enjoying the outdoors at Eagle Lake. There are a few things our vacationers should know about our emergency services. One of those is that medical transport out of the basin is by air. So having flight insurance is a must. Getting patients safely transported to the airstrip is mandatory. A few years ago, Spalding was able to purchase a used 2WD ambulance which is now deemed to be on "its last leg" per SCSD. Medical calls are the majority of the emergencies responded to.

A fund was started in 2011 to purchase a new ambulance (4WD). The goal for the District is to raise \$50,000 but they have only raised a total of \$6000. Larry Doss, Spalding Community Service District Director donated \$500 and has issued a challenge to meet his donation! Please take a moment to think about how you could be affected if you or a family member is injured or has heart or respiratory distress on the lake or at camp or in a cabin. It would be a comfort to know that you can be stabilized and transported to the airstrip, the only way out of the basin.

Please print this out and send it in with your donation.
